

Peak Alert:

Global Weather Warfare with Geothermal Engineering –

CHEM TRAILS

This is not intended as a fear tactic - simply information upon which you may choose to act.

Dane Wigington from www.geoengineeringwatch.org provides information on what's going on in the atmosphere with weather engineering and the harmful effects of Geothermal engineering, declaring that there is virtually NO NATURAL WEATHER due to the massive global climate engineering.

Our skies today are simply not normal. They are filled with nanoparticulates of heavy metals and chemicals. The very essentials needed to sustain life on earth are being recklessly destroyed by weather control programs. This is not a topic that will begin to affect us in several years, it is now already causing massive animal and plant die off around the world, as well as human illness.

We have already seen an increase in cancer from the barium and strontium carcinogens and a rise in Alzheimer's disease from the aluminum materials sprayed from airplanes, and now that they have added polymer particulate mesh to hold the chemicals in the air longer, we shall soon experience increased pulmonary dis-eases from the mesh adhering to the cells of lungs.

Some of the consequences to Chem (chemical) Trails are:

- Geoengineering related climate disruptions, extreme drought and deluge
- Ozone depletion
- Methane release
- Drastic reduction in arctic sea ice
- Global oxygen content reductions
- Oceans on the brink of collapse
- Massive fish die offs

- 200 species becoming extinct every single day
- A drastic rise in Autism, Alzheimer's, Cancer, and Dementia
- Crisis level forest reductions
- The sterilization of soils making it impossible for plants to grow without Monsanto's aluminum resistant seeds

What to do to neutralize the toxic effects of geoengineering

Make sure that you do the following every day:

- Take 2-3 tablespoons of Extra Virgin Olive Oil (EVOO)
- Eat ½ to 1 whole avocado
- Drink 1-2 cups of Thyme tea
- Drink 1 cup water with 1/4 teaspoon Real Salt®
- Put EVOO on any skin that is exposed to air when outdoors to neutralize skin damage
- Remove clothing and wash immediately after returning from outdoors, if exposed for longer than 20 minutes
- Take 1/2 teaspoon dried or 1 tablespoon fresh Cilantro daily to detoxify heavy metals

What to do for Soil:

Use Red Worms in your garden to clean up noxious chemicals from the air, or purchase red worm casting soil supplements to neutralize airborne toxins that land on soil and plants.

Please take the time to watch the informative videos, and follow up with some investigation of your own on their site — geoengineeringwatch.org, and share this information far and wide.
